

# Damon Farber, FASLA

Damon Farber Associates

Damon Farber Associates was established to provide quality services in the areas of landscape architecture, community planning, site design and urban planning. Damon Farber Associates concentrates its efforts in the planning and design of exterior spaces as they relate to aspects of circulation, maintenance, function, spatial organization and historical precedence.

We place an emphasis on the importance and value of enhancing physical aspects such that projects reflect clarity of site, landscape and compositional relationships and a strong, contextual site/structure interface. Our goal is to arrive at responsive, resourceful and sensitive schemes that meet user needs.

The firm's philosophy is premised upon the concept that above all else, the design process and product must reflect the highest level of professional expertise. This expertise is based upon aesthetic sensitivity, current technology, function, logic, and fiscal responsibility.

We have earned a reputation for being both innovative and pragmatic. I believe that this balance of aesthetics and function is a complement to the interdisciplinary philosophy & partnering approach we espouse. Most important, is the definition of a course of action which projects a desired image and which promotes a Sense of Place. That sense of place, and the resultant welcome, warmth, scale, and familiarity reflect an appreciation for the context in which a landscape is situated.

Damon Farber Associates has received numerous local and national honors for outstanding work from: the American Society of Landscape Architects (ASLA national), MASLA, US Army Corps of Engineers, Committee on Urban Environment (CUE), Consulting Engineers Council, and Hennepin County
